Notices

PLEASE READ THIS SOFTWARE LICENSE AGREEMENT CAREFULLY BEFORE DOWNLOADING OR USING THE SOFTWARE. BY CLICKING ON THE "I ACCEPT THE TERMS OF THE LICENSE AGREEMENT" BUTTON, OPENING THE PACKAGE, DOWNLOADING THE PRODUCT, OR USING THIS PRODUCT, YOU ARE CONSENTING TO BE BOUND BY THIS AGREEMENT. IF YOU DO NOT AGREE WITH ALL OF THE TERMS OF THIS AGREEMENT, CLICK THE "I DO NOT ACCEPT THE TERMS OF THE LICENSE AGREEMENT" BUTTON AND THE INSTALLATION PROCESS WILL NOT CONTINUE. RETURN THE PRODUCT TO THE PLACE OF PURCHASE FOR A FULL REFUND, OR DO NOT DOWNLOAD THE PRODUCT. YOUR GENERAL TERMS OF BUSINESS DO NOT APPLY.

General

In this software license agreement:

- a) "Mindarray" means Mindarray Systems Pvt Ltd., 14/3, Magnet Corporate Park, 100 Feet Road, S.G Highway, Near Sola Bridge Opp. Grand Cambay, Thaltej, Ahmedabad, Gujarat. India.
- b) "Customer" means the individual(s), organization or business entity buying a license of the software from Mindarray or its distributors or its resellers.
- c) "Software" means computer programs (and their storage medium) supplied by Mindarray and known collectively as "Mindarray IP Address Manager" in which Mindarray has propriety rights for its any user manuals, example code, operating instructions, brochures and all other documentation relating to the said computer programs (the expression "software" to include all or any part or any combination of software).

License Grant

This license grants you the following rights:

- a) Software product: Mindarray grants to you an exclusive license to use the software for the sole purposes of designing, developing, and testing your software components or applications ("applications"). You may install the software on any computer in your organization.
- b) Electronic documents: Solely with respect to electronic documents included with the software, you may make an unlimited number of copies (either in hardcopy or electronic form), provided that such copies shall be used only for internal purposes and are not republished or distributed to any third party.
- c) License file: A file provided at the time of sale uniquely identifies each license. This license grant is contingent upon the purchase of a license file from Mindarray or one of Mindarray's resellers.
- d) Sample code: Mindarray grants you the right to use and modify the source code parts of the software that are listed in the "projects" and "scripts" subdirectories (if available).
- e) Redistribution: The software is made available for download solely for use by end users according to the license agreement. Any reproduction or redistribution of the software not in accordance with the license agreement is expressly prohibited.
- f) Trial software: If the software is installed without a serial number then, notwithstanding other sections of this license, you may use the software for up to 30 days after installation.
- g) Not for resale software: If the software is labeled as "not for resale " or "NFR" then, notwithstanding other sections of this license, you may not resell, or otherwise transfer the value of software, neither distribute any redistributables.
- h) Reservation of rights: Mindarray reserves all rights not expressly granted to you in this license agreement. The license is granted to the customer on a non-exclusive-basis which means that Mindarray will grant the license also to their individuals, organizations and business entities.
- i) This license agreement consists of no obligations for Mindarray to offer support (services), help (services) or maintenance (services) relating to the software. Obligations for Mindarray to offer maintenance (services) relating to the software can only arise from a maintenance agreement between Mindarray and customer. General terms of business of the customer do not apply.

Upgrades and Supplements

If the software is labeled as an upgrade, you must be properly licensed to use a product identified by Mindarray as being eligible for the upgrade in order to use the software. Software labeled as an upgrade replaces and/or supplements the product that formed the basis for your eligibility for the upgrade. You may use the resulting upgraded product only in accordance with the terms of this license unless we provide other terms along with the update or supplement. If the software is an upgrade of a component or a package or software programs that you licensed as a single product, the software may be used and transferred only as part of that single product package.

Limitation on Reverse Engineering, Decompilation, And Disassembly

Customer may not reverse engineer, decompile, or disassemble the software, except and only to the extent that it is expressly permitted by applicable law notwithstanding this limitation.

Termination

Without prejudice to any other rights, Mindarray may cancel or dissolve this license agreement if the customer does not abide by the terms and conditions of this license agreement, in which case customer must destroy all copies of the software and all of its component parts.

Limited Warranty

Mindarray warrants that for a period of ninety (90) days from the date of shipment from Mindarray. The media on which the software is furnished will be free of defects in materials and workmanship under normal use.

The software substantially conforms to its published specifications. Except for the foregoing, the software is provided as is. This limited warranty extends only to the customer as the original licensee. Customer's exclusive remedy and the entire liability of Mindarray and its suppliers under this limited warranty will be, at Mindarray or its service center's option, repair, replacement, or refund of the software if reported (or, upon request, returned) to the party supplying the software to the customer. In no event does Mindarray warrants that the software is error-free or that customer will be able to operate the software without problems or interruptions. The customer will safeguard Mindarray against any claim relating to the use of the software by the customer. This warranty does not apply if the software: (a) has been altered, except by Mindarray; (b) has not been installed, operated, repaired, or maintained in accordance with instructions supplied by Mindarray; (c) has been subjected to abnormal physical or electrical stress misuse, negligence, or accident; (d) is used in high-risk activities, including the operation of nuclear facilities, aircraft navigation, air traffic control, weapons systems, life support or medical applications for use in any circumstance in which the failure of the software could lead directly to death, personal injury or damage to properties or the environment.

Limitation of Liability and Remedies

NOTWITHSTANDING ANY DAMAGES THAT YOU MIGHT INCUR FOR ANY REASON WHATSOEVER (INCLUDING, WITHOUT LIMITATION ALL INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR MULTIPLE DAMAGES SUCH AS BUT NOT LIMITED TO, LOST BUSINESS OR PROFITS, LOSS OF GOODWILL, WORKS TOP PAGE AND DATA LOSS), THE ENTIRE LIABILITY OF MINDARRAY AND ANY OF ITS SUPPLIERS UNDER ANY PROVISION OF THIS LICENSE AGREEMENT AND YOUR EXCLUSIVE REMEDY FOR ALL OF THE FOREGOING (EXCEPT FOR ANY REMEDY OF REPAIR OR REPLACEMENT ELECTED BY MINDARRAY WITH RESPECT TO ANY BREACH OF THE LIMITED WARRANTY) SHALL BE LIMITED TO THE AMOUNT ACTUALLY PAID BY YOU FOR THE SOFTWARE. MINDARRAY IS RELIEVED OF ANY OBLIGATION TO PAY DAMAGES IF THE CUSTOMER HAS NOT UPGRADED THE SOFTWARE WHEN POSSIBLE. THE FOREGOING LIMITATIONS, EXCLUSIONS, AND DISCLAIMERS (INCLUDING SECTIONS 4, 5 AND 6 ABOVE) SHALL APPLY TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EVEN IF ANY REMEDY FAILS ITS ESSENTIAL PURPOSE.

Entire Agreement

This license agreement (including any addendum or amendment to this license agreement which is included with the software) is the entire agreement between you and Mindarray relating to the software and the support services (if any) and they supersede all prior or contemporaneous oral or written communications, proposals and representations with respect to the software or any other subject matter covered by this license agreement. To the extent the terms of any Mindarray policies or programs for support services conflict with the terms of this license agreement, the terms of this license agreement shall control.

The customer is not allowed to alienate or transfer any rights relating to this license agreement without the written approval of Mindarray.

THIS AGREEMENT SHALL BE CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE INDIAN GOVERNMENT AND THE INDIAN COURTS SHALL HAVE SOLE JURISDICTION IN ANY DISPUTE RELATING TO THESE CONDITIONS. ALL DISPUTES HEREUNDER SHALL BE RESOLVED EXCLUSIVELY IN THE APPROPRIATE COURT IN THE CITY OF AHMEDABAD, INDIA. If any part of these conditions shall be or become invalid or unenforceable in any way and to any extent by any existing or future rule of law, order, statute or regulation applicable thereto, then the other conditions shall remain in full force and effect as all other provisions.

The conditions of this license agreement remain applicable after the termination of this license agreement if this results from the nature of the condition.

Copyright

The software is protected by copyright and other intellectual property laws and treaties. Mindarray or its suppliers own the title, copyright, and other intellectual property rights in the software. The granting of a license does not constitute a transfer of any intellectual property right. The software is licensed, not sold.

1 Notes

** Applicable when updated from v7.1.xxx

1. All Service Level Agreements (SLA) are lost when you migrate to current version. Create a backup and manually add SLAs again in new upgraded version.
2. SLA Report Job plugin is discontinued in this version. Please remove the plugin from the system. We have plans to enable the plugin again in near future.
3. All topologies (topology.yml, linked.yml, unlinked.yml, and node-positions.yml) are lost when you migrate to current version. You are required to create new topologies. However, clients who are using the version 7.1.060 can replace the new blank topology files with files from their backup and restore existing topologies.
4. You cannot import the monitors from the previous versions.
5. The existing alerts in alert stream will stop and only new alerts after upgrade will be visible. New alerts starts with the first poll of monitor.
6. If you have a widget that shows counters for both availability and metric, you can update the widget by removing one of the counters. Also, you can create two separate widgets to count availability and metric.
7. The user preferences (like Default home screen, show/hide columns, etc.) are lost when you migrate to current version.
8. For Topology, CDP, LLDP and ISIS should be enabled.

** Applicable when updated from v7.2.xxx

9. NCM logs will be lost.

| 5. | Flow's screenshot |
| 6. | Total Monitor's screenshot |
| 7. | Monitor Templates Screenshot |
| 8. | Monitor Tag's Screenshot |
| 9. | Total Flow/log/monitor alert's screenshot |
| 10. | Action Profile |
| 11. | Total RPE if any |
| 12. | Product License |

3 Backup Installation Steps

1. Create backup of motadata configuration files.
 - a. Go to motadata URL and navigate to Schedulers and select current date.
 - b. Click on **Add** button of **Motadata Config Backup Job** and create the scheduler with name e.g. **Backup**.
 - c. Run the scheduler.

2. Stop the motadata service in Motadata Master Servers.
3. If Motadata application is installed on physical machine then:
 - a. Log into the application server with the user credentials
 - b. Take a backup of /motadata/motadata folder and copy to some other folder e.g. /opt folder
4. If Motadata application is installed on Virtual Machine then take a snapshot for the current virtual machine.

4 Upgrade Motadata

4.1 Master Server Installation Steps

1. Stop Motadata Service.
2. Take SSH of Motadata Master Server.

Skip following steps (Step 3 – 10) if packages are already installed

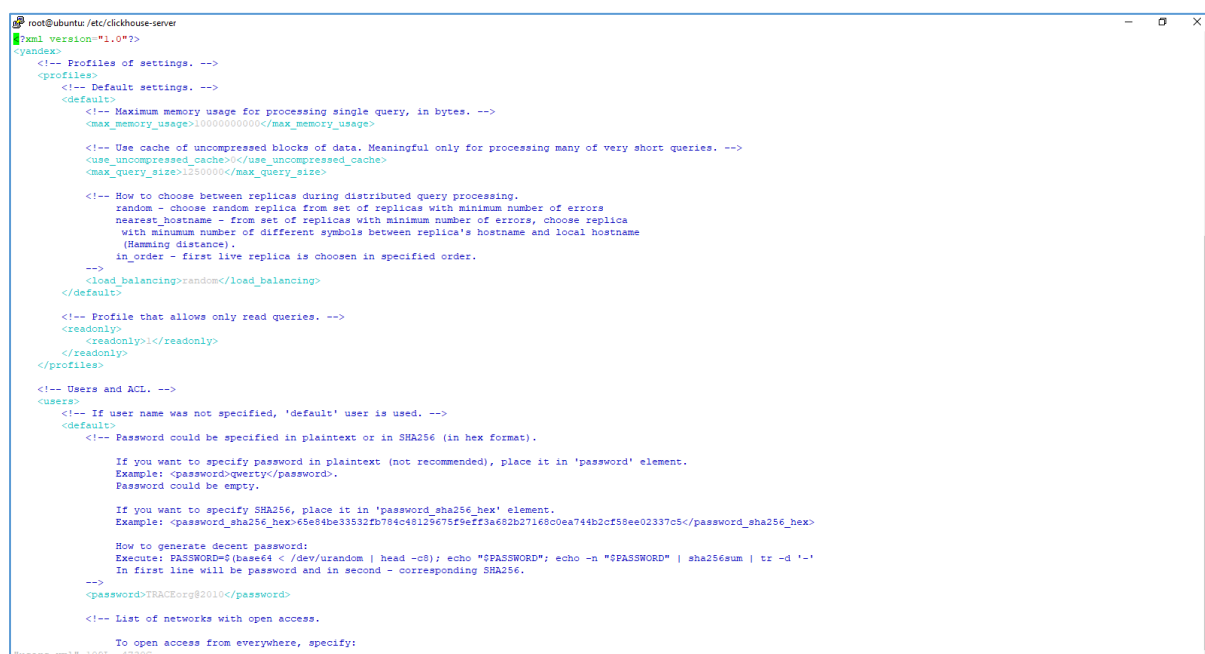

3. Download **python-pkgforNCM.tar.gz** [only upgrade from 6.9.058 or below], **packages.tar.gz** and **packagesubuntu.tar.gz** from the link in email into the local machine.
4. Copy the **python-pkgforNCM.tar.gz**, **packages.tar.gz** and **packagesubuntu.tar.gz** into motadata folder of server. (command: cd /motadata)
5. [Perform step if only upgrade from 6.9.058 or below version] Extract the file python-pkgforNCM.tar.gz (command: tar -xzvf python-pkgforNCM.tar.gz)
6. Go to python-pkg folder (command: cd /python-pkg)
7. Run Install_ncm (command: ./Install_ncm)
8. Extract the file packages.tar.gz (command: tar -xzvf packages.tar.gz)
9. Go to packages folder (command: cd /packages)
10. Install python packages in the give order:

```
pip install --no-index --find-links="/PyYAML/" PyYAML
pip install --no-index --find-links="/pyzmq/" pyzmq
pip install --no-index --find-links="/redis/" redis
pip install --no-index --find-links="/pysnmp/" pysnmp
pip install --no-index --find-links="/pings/" pings
pip install --no-index --find-links="/pathlib/" pathlib
pip install --upgrade --no-index --find-links="/setuptools/" setuptools
Run - dpkg -l | grep -i libffi-dev
```

 - i. If above command returns results continue with step i.
 - ii. If above command returns nothing then use following commands:
 - a. Go to motadata directory (command: cd /motadata)
 - b. Extract the files (command: tar -xzvf **packagesubuntu.tar.gz**)
 - c. Go to packages folder (command: cd packages)
 - d. De-package the files (command: **dpkg -i *.deb**)

```
pip install --upgrade --no-index --find-links="/cffi/" cffi
pip install --no-index --find-links="/gevent/" gevent
pip install --no-index --find-links="/greenlet/" greenlet
```
11. Download **motadata-upgrade.zip** file from the link in email into the local machine and extract the zip file.

12. Delete existing **upgrade.zip**, **upgrade**, **motadata-upgrade**, **motadata-upgrade.conf** files from **/motadata/motadata/** if exist in the folder.
13. Copy **motadata-upgrade**, **motadata-upgrade.config** and **upgrade.zip** from download location to motadata master-node directory. e.g. **/motadata/motadata/**
14. Add 775 permission to motadata-upgrade. e.g.: **chmod 775 motadata-upgrade**
15. Run **motadata-upgrade** by command: **./motadata-upgrade <current_motadata_version>** [e.g.: **./motadata-upgrade 7.1.021**] and wait for update to complete.
16. [Skip this step if already exist] Add a parameter **"<max_query_size>1250000</max_query_size>"** in **users.xml** located at **/etc/clickhouse-server/** of clickhouse as per shown in the screen.

```

root@ubuntu:/etc/clickhouse-server
└─$ cat /etc/clickhouse-server/users.xml
<?xml version="1.0"?>
<profiles>
  <!-- Profiles of settings. -->
  <profiles>
    <!-- Default settings. -->
    <default>
      <!-- Maximum memory usage for processing single query, in bytes. -->
      <max_memory_usage>1000000000</max_memory_usage>

      <!-- Use cache of uncompressed blocks of data. Meaningful only for processing many of very short queries. -->
      <use_uncompressed_cache>0</use_uncompressed_cache>
      <max_query_size>1250000</max_query_size>

      <!-- How to choose between replicas during distributed query processing.
      random - choose random replica from set of replicas with minimum number of errors
      nearest_hostname - from set of replicas with minimum number of errors, choose replica
      with minimum number of different symbols between replica's hostname and local hostname
      (Hamming distance).
      in_order - first live replica is chosen in specified order.
      -->
      <load_balancing>random</load_balancing>
    </default>

    <!-- Profile that allows only read queries. -->
    <readonly>
      <readonly></readonly>
    </readonly>
  </profiles>

  <!-- Users and ACL. -->
  <users>
    <!-- If user name was not specified, 'default' user is used. -->
    <default>
      <!-- Password could be specified in plaintext or in SHA256 (in hex format).

      If you want to specify password in plaintext (not recommended), place it in 'password' element.
      Example: <password>query</password>.
      Password could be empty.

      If you want to specify SHA256, place it in 'password_sha256_hex' element.
      Example: <password_sha256_hex>65e84be33532f7b4c48125675f9eff3a682b2716200ea744b2c9f50ee0233705</password_sha256_hex>

      How to generate decent password:
      Execute: PASSWORD=$(base64 < /dev/urandom | head -c8); echo "$PASSWORD"; echo -n "$PASSWORD" | tr -d '-'
      In first line will be password and in second - corresponding SHA256.

      -->
      <password>TRACEorg2010c/password</password>

      <!-- List of networks with open access.

      To open access from everywhere, specify:
      "users.xml" 109L, 4730C

```

17. If trap engine feature turned off, turn the feature ON navigate to the folder **/motadata/motadata/config** and open **motadata-conf.yml**. Set the flag **"trap-engine": "yes"**.
18. If SLA engine feature turned off, turn the feature ON navigate to the folder **/motadata/motadata/config** and open **motadata-conf.yml**. Set the flag **"sla-engine": "yes"**.
19. If alert correlation feature is turned off, turn the feature ON navigate to the folder **/motadata/motadata/config** and open **motadata-conf.yml**. Set the flag **"alert-correlation-engine": "yes"**.
20. Only for client version 7.1.060: Replace the files **topology.yml**, **linked.yml**, **unlinked.yml** and **node-positions.yml** from the back up folder (e.g. **/motadata/motadata/topology**).
21. Assign permission **motadata-alert-correlation** to 775 at location **/motadata/motadata/motadata-alert-correlation** by command **[chmod 775 /motadata/motadata/ motadata-alert-correlation]**.
22. [Skip step if already configured] Go to the Folder **/motadata/motadata/plugin-lib** and delete both below files (if present)
 - commons-net-3.3.jar
 - commons-net-3.6.jar

- a. [Skip step if already configured] Go to /motadata/motadata and add "option -Djava.security.egd=file:/dev/./urandom" in following config files
 - motadata-flow.config
 - motadata-metric.config
 - motadata-rpe-master.config
 - restore-util.config
 - motadata.config
 - motadata-job.config
 - motadata-discovery.config
 - motadata-log.config
 - motadata-ncm.config
 - shutdown.config
 - motadata-sla.config
 - motadata-cluster.config
 - motadata-ha.config
 - motadata-trap.config
23. Start Motadata Service.
24. If you face any problem during upgrade, perform the following steps:
 - a. Stop Motadata Service.
 - b. Check log at /motadata/motadata/log/**-MOTADATA-UPGRADE-**.log.
 - c. Assign permission tftp-files to 775 at location /motadata/motadata/tftp-files by command [chmod 775 /motadata/motadata/tftp-files/]
 - d. Assign permission motadata-ncm to 775 at location /motadata/motadata/motadata-ncm by command [chmod 775 /motadata/motadata/motadata-ncm]
 - e. Assign permission motadata-sla to 775 at location /motadata/motadata/motadata-sla by command [chmod 775 /motadata/motadata/motadata-sla]
 - f. Assign permission motadata-cluster to 775 at location /motadata/motadata/motadata-cluster by command [chmod 775 /motadata/motadata/motadata-cluster]
 - g. Assign permission motadata-ha to 775 at location /motadata/motadata/motadata-ha by command [chmod 775 /motadata/motadata/motadata-ha]
 - h. Assign permission motadata-trap to 775 at location /motadata/motadata/motadata-trap by command [chmod 775 /motadata/motadata/motadata-trap]
 - i. Assign permission motadata-alert-correlation to 775 at location /motadata/motadata/motadata-alert-correlation by command [chmod 775 /motadata/motadata/ motadata-alert-correlation].
 - j. Start Motadata Service.
25. You to run the Topology Job to create a Topology.
26. Verified the screenshot.

4.2 [Plugin Installation Steps](#)

1. Download latest apps and update apps to new version.
2. For universal log parser plug-in first need to remove the plug-in and reinstall the same from given link.
3. Reboot Motadata service.

Notes: Before enabling motadata trap engine please install motadata-trap-engine app.

4.3 RPE Client Installation Steps

1. Stop the motadata service in RPE Client Servers.
2. Take the backup of **lib**, **motadata-lib**, **plugin-lib**, **plugins**, **motadata python engine** of RPE Client Servers into some folder e.g. /opt/old.
3. Take the backup of the following workers into some folder e.g. /opt/workers/.
 - motadata,
 - motadata.config
 - motadata-discovery
 - motadata-discovery.config
 - motadata-metric
 - motadata-metric.config
 - motadata-ncm
 - motadata-ncm.config
 - motadata-rpe-client
 - motadata-rpe-client.config
 - shutdown
 - shutdown.config
4. Download [packages.tar.gz](#) and [packagesubuntu.tar.gz](#) form the link in email into the local machine.
5. Take SSH of Motadata Master Server.

Skip following steps (Step 6 – 12) if packages are already installed

6. [Perform step if only upgrade from 6.9.058 or below version] Extract the file **python-pkgforNCM.tar.gz** (command: `tar -xzf python-pkgforNCM.tar.gz`)
7. Go to python-pkg folder (command: `cd /python-pkg`)
8. Run **Install_ncm** (command: `./Install_ncm`)
9. Copy the packages.tar.gz and packagesubuntu.tar.gz into motadata folder of server. (command: `cd /motadata`)
10. Extract the file (command: `tar -xzf packages.tar.gz`)
11. Go to packages folder (command: `cd /packages`)
12. Install python packages in the give order:

```
pip install --no-index --find-links="/PyYAML/" PyYAML
pip install --no-index --find-links="/pyzmq/" pyzmq
pip install --no-index --find-links="/redis/" redis
pip install --no-index --find-links="/pysnmp/" pysnmp
pip install --no-index --find-links="/pings/" pings
pip install --no-index --find-links="/pathlib/" pathlib
pip install --upgrade --no-index --find-links="/setuptools/" setuptools
Run - "dpkg -l | grep -i libffi-dev"
```

 - i. If above command returns results continue with step i.
 - ii. If above command returns nothing then use following commands:
 - a. Go to motadata directory (command: `cd /motadata`)
 - b. Extract the files (command: `tar -xzf packagesubuntu.tar.gz`)
 - c. Go to packages folder (command: `cd packages`)
 - d. De-package the files (command: `dpkg -i *.deb`)

```
pip install --upgrade --no-index --find-links="/cffi/" cffi
```

```

pip install --no-index --find-links="/gevent/" gevent
pip install --no-index --find-links="/greenlet/" greenlet

```

13. Replace the **lib**, **motadata-lib**, **plugin-lib**, **plugins**, **motadata python engine**, **ncm-configuration-files** and **device-conf** from **/motadata/motadata** folder of Motadata Master Server to all the RPEs.
14. Replace the **workers**, **motadata**, **motadata-discovery**, **motadata-metric**, **motadata-ncm**, **motadata-alert-correlation** and **motadata-rpe-client** from **<Current Migration Version>/RPE** folder of extracted **upgrade.zip**. Make sure all the workers has 775 permission excluding **.config** files.
15. If in RPE **alert-stream-operation.t**, **alert-last-seen-context** and **alert-last-seen-context.p** cache files exist, you need to delete them manually.
16. [Skip step if already configured] Perform step as per document **WMI Plug in Configuration Step**.
17. [Skip step if already configured] Go to **/motadata/motadata/jdk/jre/lib/security** and replace following files from master. The files are available in master on same location:
 - **local_policy.jar**
 - **US_export_policy.jar**
18. Open **motadata.config.yml** file from **/motadata/motadata/config** and add key **"sla-engine": "no"** at the end of the file. If in **motadata.config.yml** file of **Motadata Master Server** the flag value is yes, then in RPE client Server **motadata.config.yml** file, you require to set **"sla-engine": "yes"**.
19. [Skip step if already configured] Go to **/motadata/motadata** and add **"option -Djava.security.egd=file:/dev/./urandom"** in following config file
 - **motadata-flow.config**
 - **motadata-metric.config**
 - **motadata-rpe-client.config**
 - **motadata.config**
 - **motadata-discovery.config**
 - **motadata-ncm.config**
 - **shutdown.config**
20. [Skip step if already configured] Go to **/motadata/motadata/** and add following files from master. The files are available in master on same location:
 - **motadata-alert-correlation.config**
21. Open **motadata.config.yml** file from **/motadata/motadata/config** and add key **"alert-correlation-engine": "no"** at the end of the file. If in **motadata.config.yml** file of **Motadata Master Server** flag value is yes then in RPE client Server **motadata.config.yml** file, you require to set **"alert-correlation-engine": "yes"**.

Start the motadata service in all the RPE Client Servers.

5 [Configure NCM](#)

5.1 [Add Server Information \[Skip if already configured\]](#)

1. Connect to the motadata server with ssh.
2. Go to **/motadata/motadata/config**
3. Edit **ncm-conf.yml** file.
4. Enter the IP address of TFTP-Server-host (line 2)
5. Save the file.

5.2 Add Cisco Device Type [Skip if already imported]

1. Open the Motadata GUI
2. Go to NCM > Actions
3. Click on Import.
4. Input the Cisco file provided in email
5. Click Save.

6 Configure GIS [Skip if already imported]

1. Connect to the motadata server with SSH.
2. Go to `/motadata/motadata/config`
3. Edit `rest-api-url` file.
4. Enter the IP address, port number and relative path of GIS API URL.
5. Save the file.

7 Rollback – Failover Steps

7.1 Motadata Master Server

1. Stop the motadata service.
2. If Motadata application is installed on a physical machine then perform following steps:
 - a. Restore the backup of `/motadata/motadata` folder as taken in step 2 of Backup installation Steps.
3. If Motadata application is installed on Virtual Machine then perform following steps:
 - a. Revert the snapshot of virtual machine as taken in step 3 of Backup Installation Steps.
4. Start the motadata service.

7.2 Motadata RPE Client Server

1. Stop the motadata service.
2. Restore the backup of `lib` from the backup folder e.g. `/opt/old`
3. Restore the backup of `workers` from the backup folder e.g. `/opt/workers/`.
4. Start the motadata service.

About Motadata

Mindarray Systems Pvt. Ltd. a global IT product company, offers state of the art affordable yet powerful product suite - Motadata consisting of Network Management & Monitoring, Log & Flow Management, and IT Service Management Platforms. The platform empowers both IT administrators and CXOs to analyze, track & resolve IT operational issues by effectively monitoring various systems and devices from multiple vendors through a unified and centralized dashboard.

Motadata is industry's first IT ops solution that truly correlates the metric, flow and log events and turns them into actionable insights. Our global customers from Telecom, Government and Enterprise domain, rely on Motadata for proactively monitor their network infrastructure.
